-

2023 Q1

To be continued...

Baby Vizsla
RISE OF THE FUTURE

BABY VIZSLA INU GOALS

One of our main target is to list our token on every relevant digital exchanges, because high holder number can generate more transaction value and it will create our golden fund to help orphans. We want to be spread around the world as fast as possible by the power of the good deeds that we acn share with the ones in need.

BABYVIZSLA were born in the incubator program of the most popular hungarian token Hungarian Vizsla Inu, but we are also stepping on the (inter)national stage. Our purpose is clear without any black shadow, just to be a rock solid base for orphans, be the guard of their future, be their pillar of hope.

We are active, we are funny and supportive with decades of experience in many fields like marketing, hospitality and in the finance sector. So let's meet up in this project and be a valued and active member of our happy community.

In long-term we want to become a popular altcoin as we will develop our own utility.

Our Altcoin project is about to create a social media platform aimed for the pet-friendly community and which will be party fueled with BabyVizsla token. Providing an opportunity for pet owners to create personalized profiles for their own pets while they can also make friends and acquaintances, which we want to implement internationally. We plan to delegate pet beauty contests internationally through the platform. Once sufficient traffic is achieved, sponsors and paid advertisements will be inserted to further support the project.

That is how we want to earn our land and place in the crypto world.

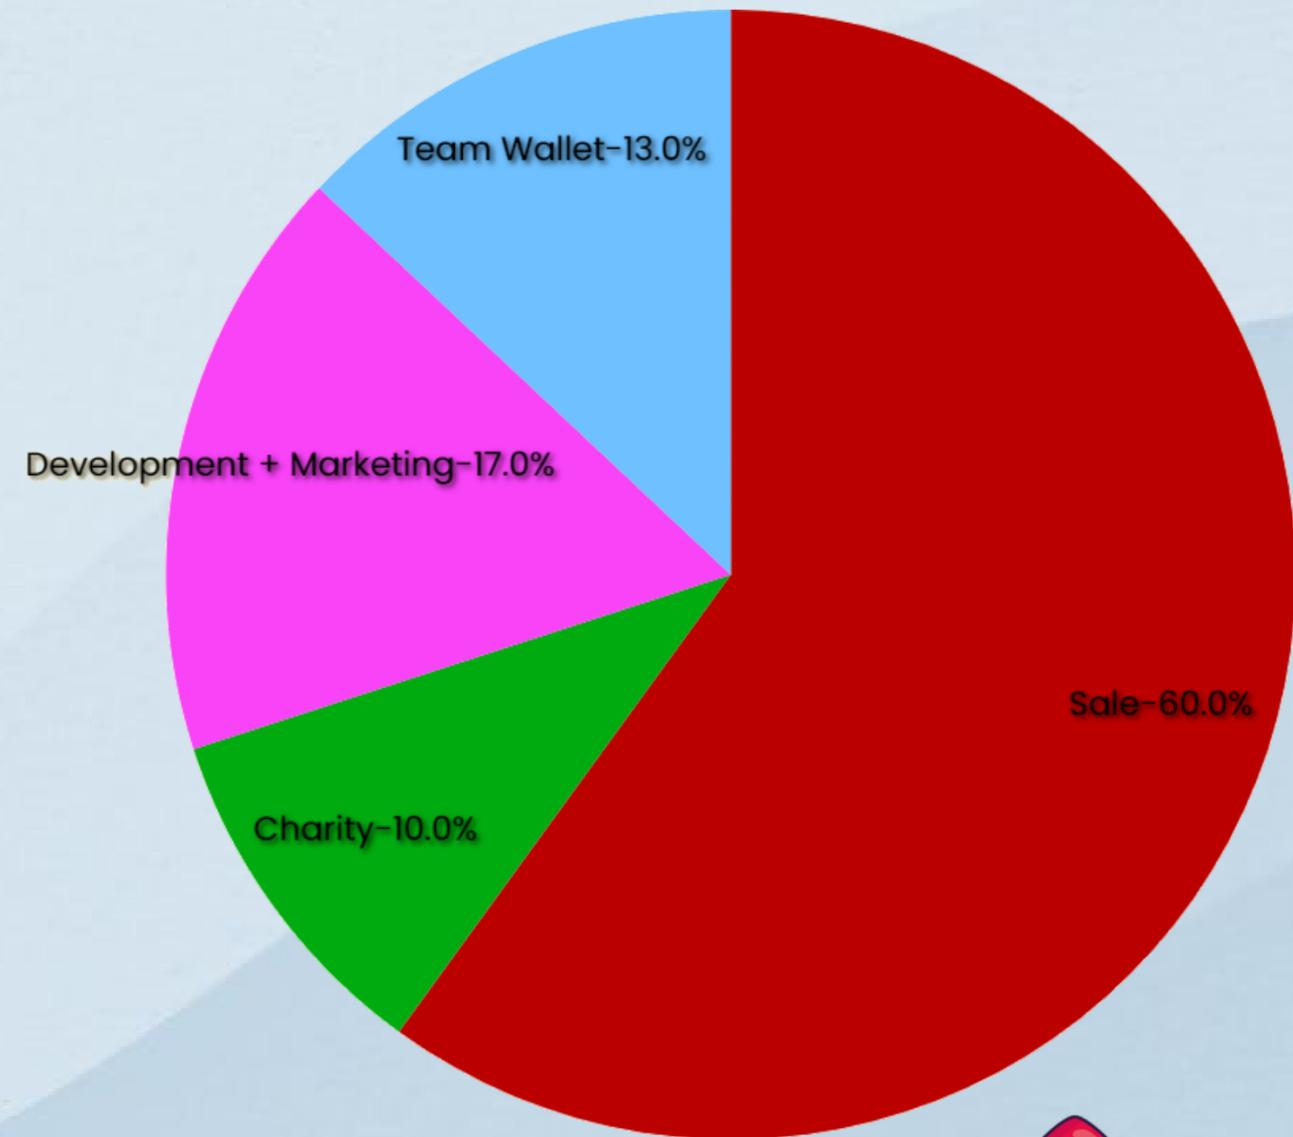

BABY VIZSLA INU TOKENOMICS

Every transactions has an automatic 13% transaction tax.

At the start:

- 60% Coins for Sale (Liquidity)
- 17% Development and marketing
- 13% Team Wallet
- 10% Charity

RISE OF THE FUTURE

REWARD

- Cooperation and partnerships are important, so we give Hungary's most popular Token as a reward, namely the HUNGARIAN VIZSLA INU Token.
- With each transaction 7% of the value is distributed to existing holders in HVI Token. Minimum 5,000,000,000 BABYVIZSLA Token Holders.
- HVI Tokens stored in the treasury serve as an extra reward for strengthening the community. Examples: Promotions, contests, airdrops, content making etc.

LIQUIDITY POOL

- Part of the core logic of the BABYVIZSLA Token contract is an automatic liquidity pool algorithm. 4% of each buy and sell is accumulated and then added to the PancakeSwap liquidity pool (LP Fee).
- One of the core aim is to reduce the price impact when larger wallets decide to sell their tokens at any point in time.
- Having this algorithm in place, in theory, it helps to reduce the large price fluctuations that can be seen in other tokens, when the project becomes larger.
- In short, the tokens and BNB added to the liquidity pool creates stability and an increased price floor.
- 100% liquidity locked for two year (2024/01).
